The Declaration of Independence

(Unanimously Adopted in Congress, July 4th, 1776, at Philadelphia)

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among nave connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are we not these truths to be sen-evident, that an men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. That whenever any Form of Government becomes destructive of these ends, any Form of Government becomes destructive of these ends, it is the Right of the People to after or to abolish it, and to institute new Government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object, evinces a design to reduce them under absolute Despotism, it is their right it is their duty, to throw off such Government, and to proto reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constraints them to after their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of im-

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation—or—large—districts of people—unless those people would—relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States, for that purpose obstructing the Laws for Naturalization of Foreigners, refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their

salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people and ent our their substance.

He has kept among us, in times of peace Standing Armies, without the Consent of our Legislatures.

He has affected to render the Military independent of superior to the Civil power. He has combined with others to subject us to a jurisdic-

He is at this time transporting large Armies of foreign Mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of Cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethern, or to fall themselves by their Hands.

the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms; Our repeated Petitions have been answered by repeated injury: A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethern. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too have been deaf to the voice of justice and consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace, Friends.

WE, THEREFORE, the Representatives of the United States of America, in General Congress Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be, free and independent States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which independent States may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we inutually pledge to cach other our Lives, our Fortunes, and

SOME gentleman who must work at the post office because, seem ingly, stamps don't mean a thing in the world to him, keeps taking issue with me for saying the rea son why successful newspapers feature so-called sensations above ture is not through any desire to pander morbid or vulgar fastes, but because the average publisher, be $\log \cdot a$ smart merchandiser, such wares in his shop window which is his front page, as are calplated to outsty the use und the trade of the general public.

My correspondent demands a answer. All right, let's make it a parable:

Suppose, mister, that tomorrow through the town where you live passes a train bearing a distinguished savant who has made some great discovery-say, the cause and cure of botts and on another train there is a taffy-halred lady who ofter a speciacular murder trial has just been triumphantly acquit ted on the ground of self-defense for shooting a gentleman friend eight or nine times in the back. Which one of these two travelers will draw the biggest crowd down to the station? And, brother, which train will you meet?

Favorite Son Keynoter,

BACK home the folks are all puffed up with pride. Our own Albin W. Barkley keynoted for the Democratic convention until the rafters warped.

Besides being a grand person and a hard-working senator, he's one of the last of the real southern sil ver-tongued-the kind that can make a song of a syllable and turn any reasonably long word into at anthem.

And does he come from the place where the true faith prevalls? The majority stabilized just as soon as we got a lot of old-timers to quit voting for Jeff Davis. We wenned them on W. J. Bryan. Ours is prob while the only congressional district in the Union that never has gone Republican, although, wher Al Smith ran, it had a comparative close call from going Baptist.

Landon Takes First Vacation in 4 Years

Topeka, Kas.-When Gov. Alf M Landon and his family left here for Estes Park, Colo., it was the start of the first vacation in four years for the Republican nominee for the presidency. He was to spend two weeks resting in preparation for the campaign and in writing the speech with which he will accept his formal notification of the nomination, in Topeka, July 23. In between he hoped to sandwich a little horse back riding, of which he is fond.

With the governor were Mrs. Lan don and the three children, Peggy Anne, nineteen; Nancy Jo, three. and John Cobb, two, and Mrs. Sam uel E. Cobb, mother of Mrs. Lan don. In adultion there were a few members of Governor Landon's

Imports Displace 33 Million Acres

New Deal Aids Foreigners to Steal Home Market From U.S. Farmers.

WASHINGTON, D. C .- Imports of foreign farm products. aided by the Roosevelt crop reduction and free trade policies. displaced 33,436,336 acres of American farm land during the year 1935 alone, an analysis of the department of commerce reports over that year reveal. This is approximately one and one-half times the amount of land in cultivation in Iowa, a leading agricultural state. This estimate is based upon the

ten year average yield of the age necessary to the production of the same crop in the United States It is also estimated that the United States rural population denied the opportunity for self-support by the 1935 importations is 1.741,000 persons. This does not include the 1,000,000 southern share croppers and farm hands thrown out of work because of the administration's cotton curtailment program.

Pork Imports Leap Up. Imports all down the line-grains, meats, hops, milk, butter, eggs, vegetable oils and their substitutes, lard substitutes, edible molasses and many others - have multiplied, in some cases fifty or 100 times, under the New Deal.

In the first four mouths of 1936 the United States consumed 10, 151,102 pounds of foreign pork, almost seven times the volume lm ported in the first four months of last year, and more than twenty The rapid rise of pork imports was accompanied by a large increase in live hog imports. In the four months the United States received 5,186, 576 pounds of live hogs, as compared with only 35,953 pounds in the corresponding period a year ago, and 2,800 pounds two years ago. Canned Meat Imports Soar.

Hog raisers fear that these blg imports will eventually cause a collapse of home markets similar to that which occurred in cattle, although production in this country is yet far below the requirements of the nation. American producers have lost many millions of dollars of trade to foreign farmers as a result of the scarcity program adopted three years ago. In four months meat valued at \$7,951,000 was brought in from other coun tries. April imports amounted to more than \$2,000,000. Two Tears ago they were \$350,000. Canned meat imports rose to 34,

807,453 pounds this year, compared with 25,613,601 a year ngo and 9,718,137 two years ago.

ly as a candidate for the vice-presdency, Col. Knox wired Gov. Lan-don: "I gladly place myself un-der your orders and will undertake to discharge every assignment you give me with all the vigor and ability I possess. We go forward to victory."

Record Federal Spending Washington, D. C.—Up to May, 1936, the Roosevelt administration has spent \$22.451,345,376. This sum is over 1% billions more than the entire national debt at the time President Roosevelt took office.

Imports Displace 33 Million Acres

New Deal Aids Foreigners to Steal Home Market From U. S. Farmers.

WASHINGTON, D. C.-Imports of foreign farm products: aided by the Roosevelt crop reduction and free trade policies. displaced 33,436,336 acres of American farm land during the vear 1935 alone, an analysis of department of commerce reports over that year reveal. This is approximately one and one-half times the amount of land in cultivation in Iowa, a leading agricultural state.

This estimate is based upon the ten-year average yield of the acre nation out of the mire of "three age necessary to the production of the same crop in the United States.

It is also estimated that the United the same crop in the United States. It is also estimated that the United States rural population denied the opportunity for self-support by the 1935 Importations is 1,741,000 persons. This does not include the 1,000,000 southern share croppers and farm hands thrown out of work because of the administra-tion's cotton curtailment program.

Pork Imports Leap Up.
Imports all down the line—
grains, meats, hops, milk, butter,
eggs, vegetable oils and their substitutes, lard substitutes, edible mostitutes, and substitutes, cubic hasses and mony others—have mul-tiplied, in some cases tilty or 100 imes, under the New Deal.

In the first four months of 1936 the United States consumed 10, 151,102 pounds of foreign pork, almost seven times the volume imported in the first four months of last year, and more than twenty times the imports of two years ago, The rapid rise of pork imports was accompanied by a large increase in live hog imports. In the four months the United States received 5,186, 576 pounds of live hogs, as compared with only 35,953 pounds in the corresponding period a year ago, and 2,800 pounds two years

Canned Meat Imports Soar.

Hog raisers fear that these blg imports will eventually cause a col-lapse of home markets similar to that which occurred in cattle, although production in this country is yet far below the requirements of the nation. American producers have lost many millions of dollars of trade to foreign farmers as a result of the scarcity program adopted three years ago. In four months meat valued at \$7,951,000 was brought in from other countries. April imports amounted to more than \$2,000,000. Two years ago they were \$350,000.

Canned meat imports rose to 34, 807,453 pounds this year, compared with 25,613,601 a year ago and 9,718,137 two years. ago.

Sailor seems to know when insect hateless are on and manages to get on the stream at just the right time to make good catches.
